VICIOUS CIRCLE

“A sequence of reciprocal cause and effect in which two or more elements intensify and aggravate each other, leading inexorably to a worsening of the situation.”

- Oxford Reference

Abbreviations / acronyms

Unknown abbreviations and acronyms appear (meetings, emails, documents)

It gets harder to ask now because I work here for years (I'll look even dumber!)

Nobody asks so "it can flow" (or afraid of looking dumb)

More abbreviations and acronyms appear

Abbreviations / acronyms

Unknown abbreviations and acronyms appear
(meetings, emails, documents)

It gets harder to ask now because I work here for years (I'll look even dumber!)

Nobody asks so "it can flow" (or afraid of looking dumb)

More abbreviations and acronyms appear

Abbreviations and acronyms

Consider: _____

- **“What does it mean?”** (even if you know it)
- Awareness: **Psychological Safety**
- **Not using it yourself** (be clear, not clever)
- Creating a **glossary**

Scrum Master superhero

VARIATIONS:

- Team member
- Boss

The Scrum Master superhero solves an impediment by him/herself

Everyone looks at the Scrum Master superhero to solve it

The team doesn't learn how to solve it

The same (or similar) impediment happens again

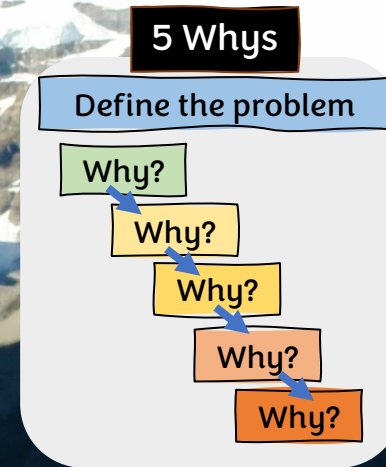

Superheros

(SM, team member, boss)

Consider:

- Finding the root causes
- Creating a Skills Matrix
- Creating a Wiki
- Try not to be the superhero

Ishikawa / Fishbone

A3 problem solving

Skills Matrix

| | | Today | | Future | | Today | | Future | | Today | | Future | | Today | | Future | | AVG | Action plan |
|--------------|----------------------|-------|---|--------|---|-------|---|--------|---|-------|---|--------|---|-------|--|--------|--|-----|-------------|

| | Scheduling | 1 | 2 | 1 | 3 | 4 | 4 | 1 | 2 | 3 | 5 | 3 | 4 | 2.2 | | | | | |

Taskboard x meetings

Task board is messy
and outdated

People don't keep it
updated

The board is not used
in events

Events are less valuable
and board is not updated

Taskboard x meetings

Consider: _____

- Finding the **root causes**
- Keeping it **simple / easy** to use
- Agreeing on **constraints**
- **Experimenting**
- **It's their board, not yours!**

4

High team turnover

"Let's hire 2 more analysts
so we can go faster"

"They are not moving
fast enough"

Onboarding is needed

Productivity slows down

High team turnover

Consider:

- Finding the **root causes** (yep!)
- Working on **team engagement/NPS**
- Visualizing the **impact of high turn over**
- Creating and using **skills matrix**
- Forgetting about the **“1 month handover”**

Technical debt

Technical debt is created

"Let's move faster!"
(speed vs quality)

Increase of complexity
(spaghetti code)

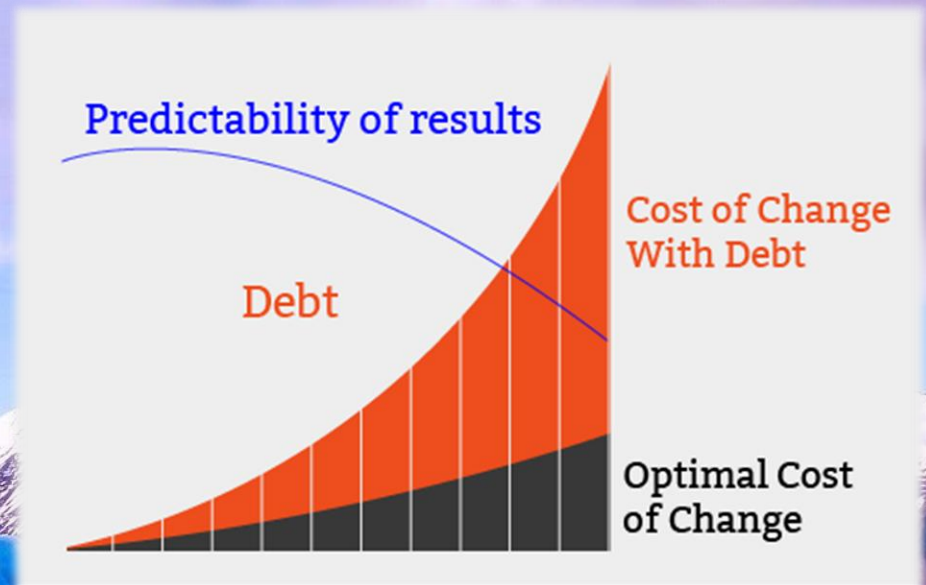

Harder to refactor,
predict/forecast

Technical debt

Consider:

- Finding the root causes :)
- Visualizing the impact of technical debt
- Dedicating X% of the Sprint for refactoring
- Creating coding conventions
- Automating tests and processes
- Scouts rule

Conflict-resolution debt

A conflict happens
in the team

Less energy to spent on
solving them

Too busy/don't know
how to solve conflicts

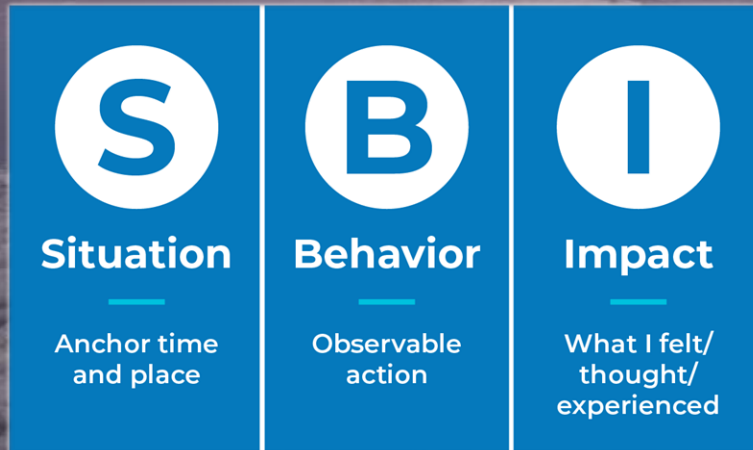

The unsolved conflicts
generate more conflicts

Conflict-resolution debt

Consider: (I pay you a beer if you guess the 1st step)

- Finding the **root causes!** :D
- Introducing:
 - **Radical Candor** (Kim Scott)
 - **The Responsibility Process** (Chris Avery)
 - **Non-Violent Communication** (Marshal B.)
 - **Impact feedback** (fact + how you felt)
- **Starting small**
- **Creating/updating team agreements**

No WIP limit

Work In Progress

Work is pushed top-down onto the team "It's high priority"

"They are not going fast enough..."

Team tries to get 50+ things done at the same time

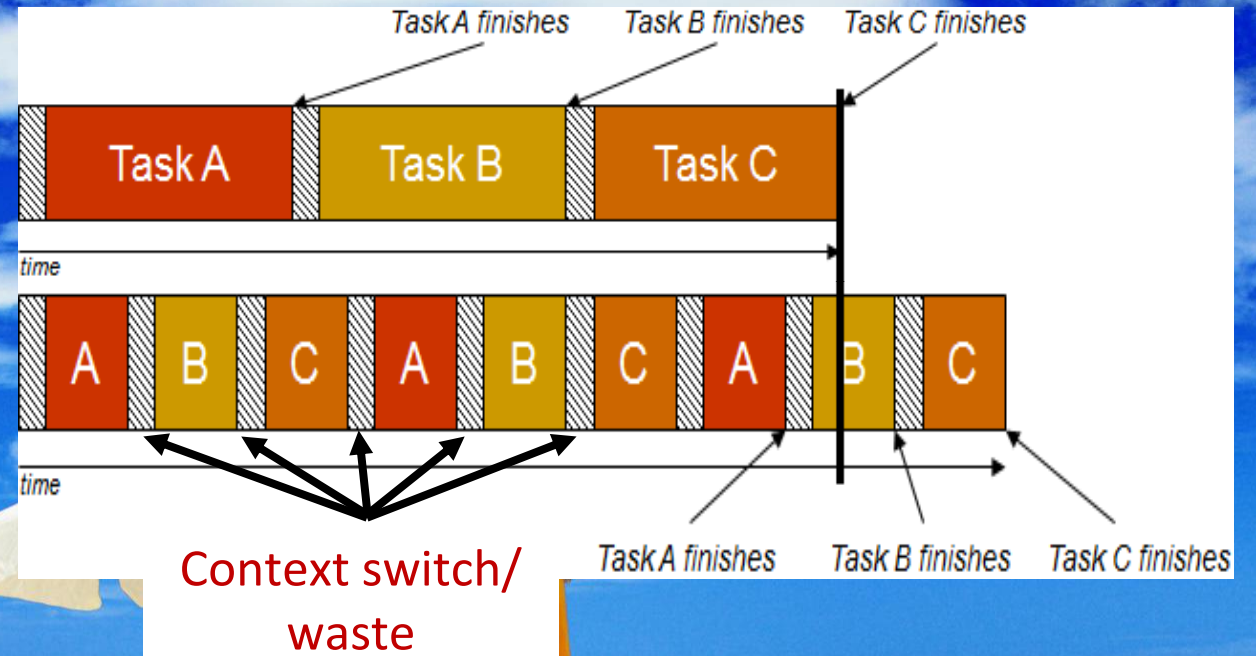

Context switching, no focus and waste

No WIP limit

Consider:

- Finding **root causes** (surprise!)
- Visualizing the **impact of high WIP**
- Aligning with **PO / leadership / stakeholders**
- New motto: **“Finish more, Start less”**
Or **“Stop starting, Start finishing”**

No time for improvement

"A 1-day training? Too long.
Can you do it in 1 hour?"

"We have too many meetings.
We are too busy!"

Lots of unnecessary conflicts
due to misalignment

Many other meetings take
place to fix these conflicts

No time for improvement

Consider:

- Finding the **root causes** (surprise!)
- Visualizing: **with** and **without** improvement
- Getting **leadership support** (dedicated time)
- Trying **small + success cases** (numbers!)
- Don't let the risk of bankruptcy to be the reason to improve/innovate.

Toxic behaviours

Company doesn't deal
with toxic behaviours

"But he/she gets things done, you know?"

Great employees start leaving...

Employees w/ toxic behaviours
reach leadership roles

These new leaders hire people
with "similar mindset"

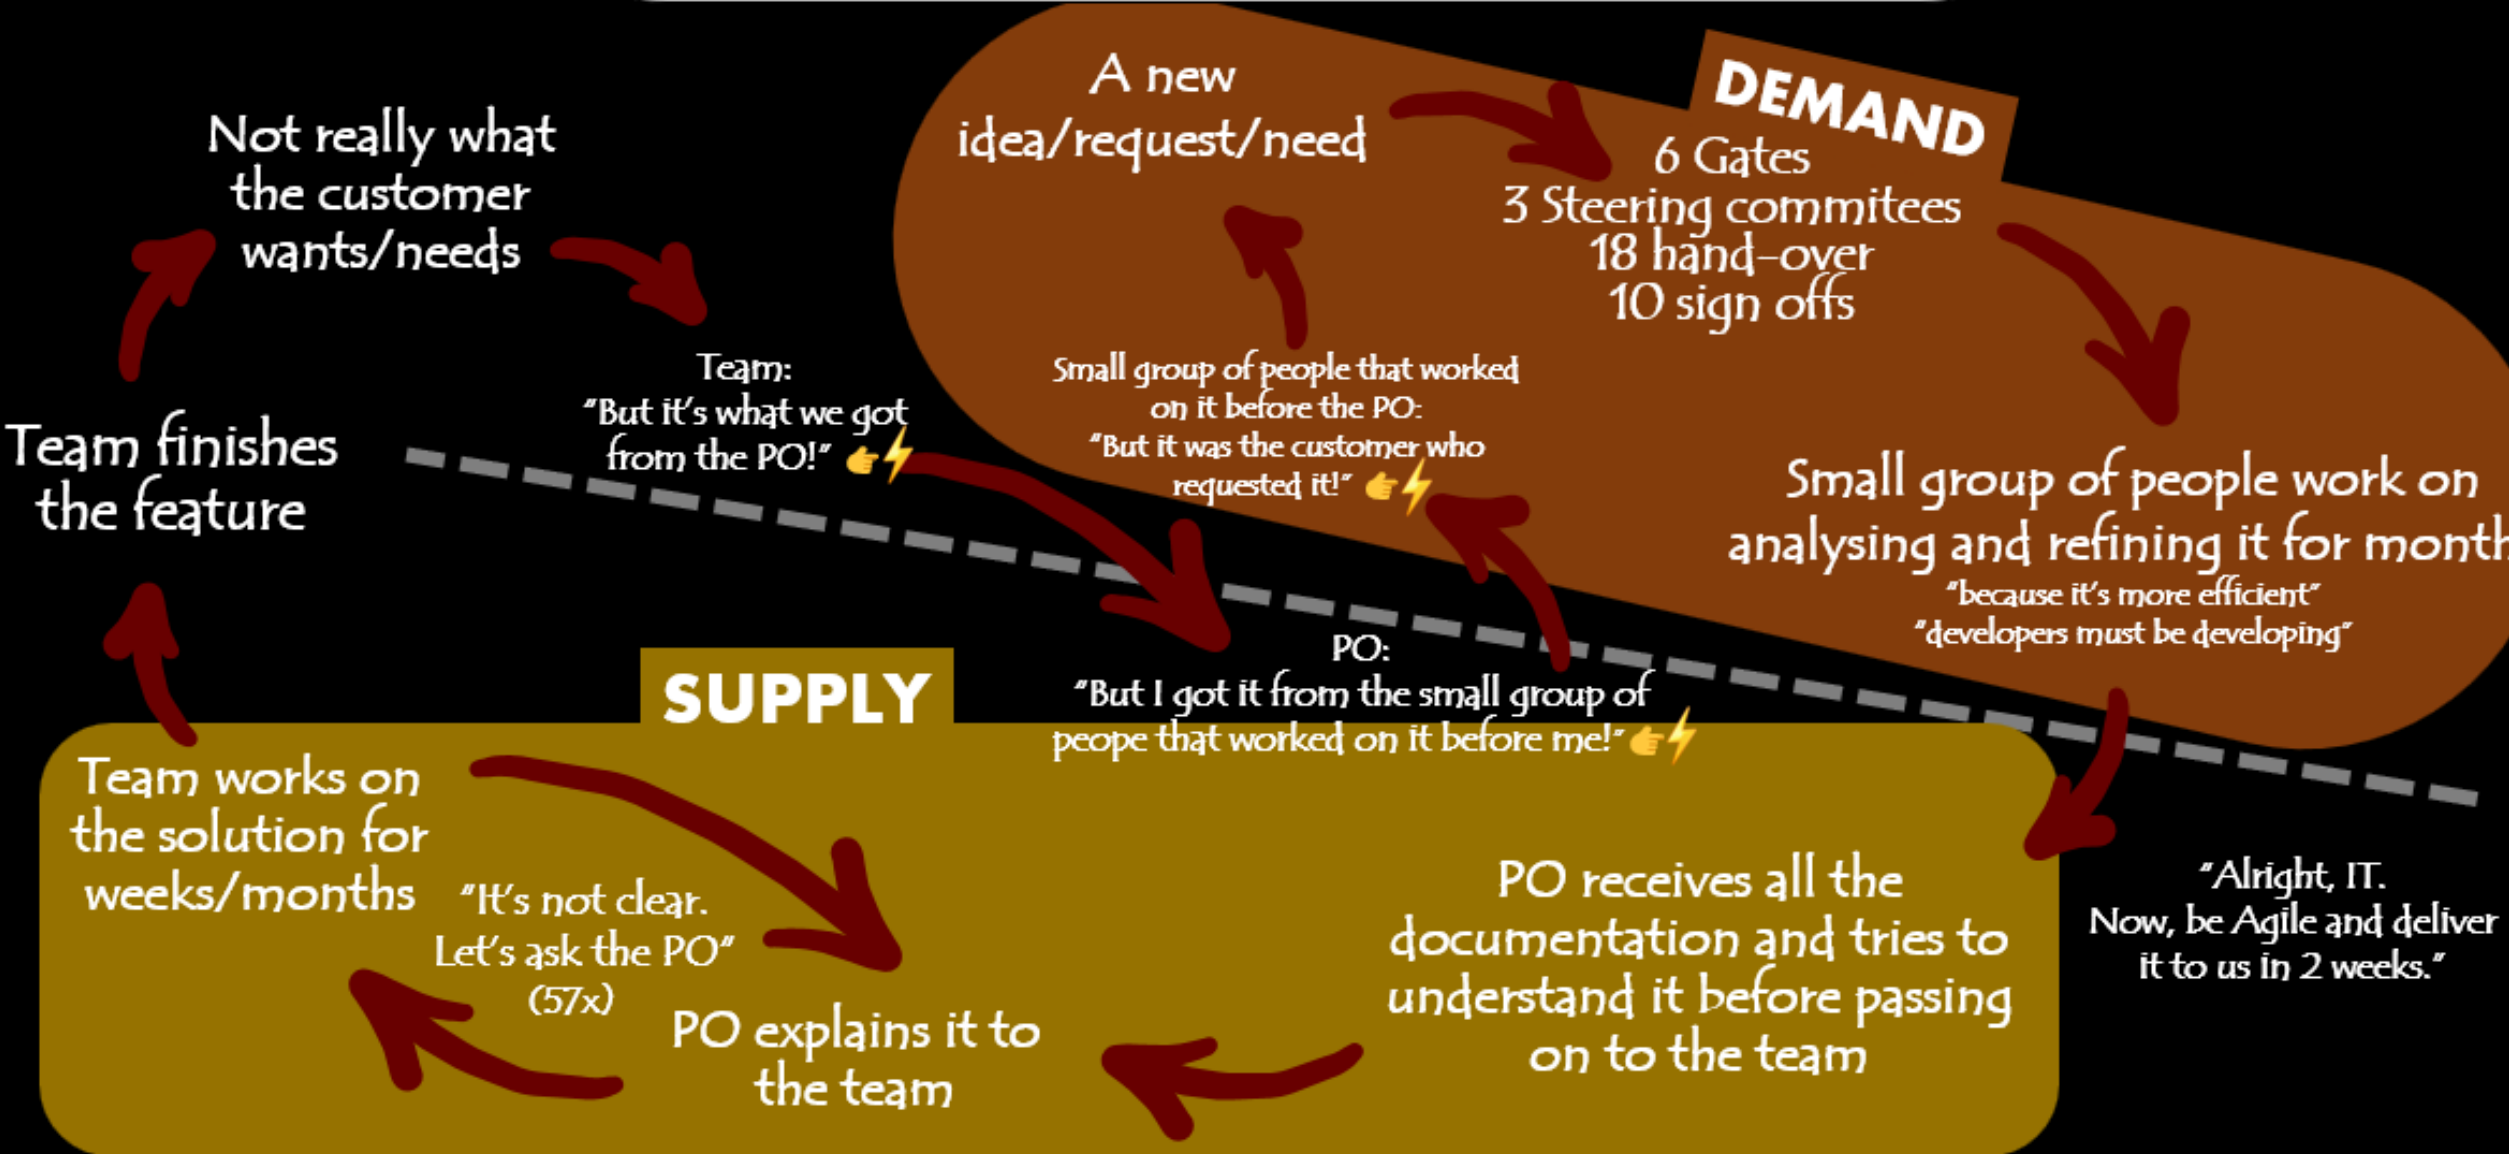

Toxic behaviours

Consider:

- **Separating the behavior from the person**
- **Roouoooooot causes! Listen to understand**
- **Possible reasons:**
 - Personal issues
 - WHY of Agile not clear
 - HR not involved (bonus/career path)
- **Adjusting Team Agreements (Big NO GO)**
- **Having hard conversations**
- **Moving a person? Make reasons very clear!**

Fake agile

Fake Agile

Consider:

- Find the root causes
- Involving business/leadership/HR
- Translating it into “pocket-pain”
- Value Stream Mapping
- User Story Mapping
- Creating success cases

VICIOUS CIRCLES

Abbreviations/acronyms

Superhero (x3)

Taskboard x meetings

High team turnover

Technical debt

Conflict-resolution debt

No WIP limit

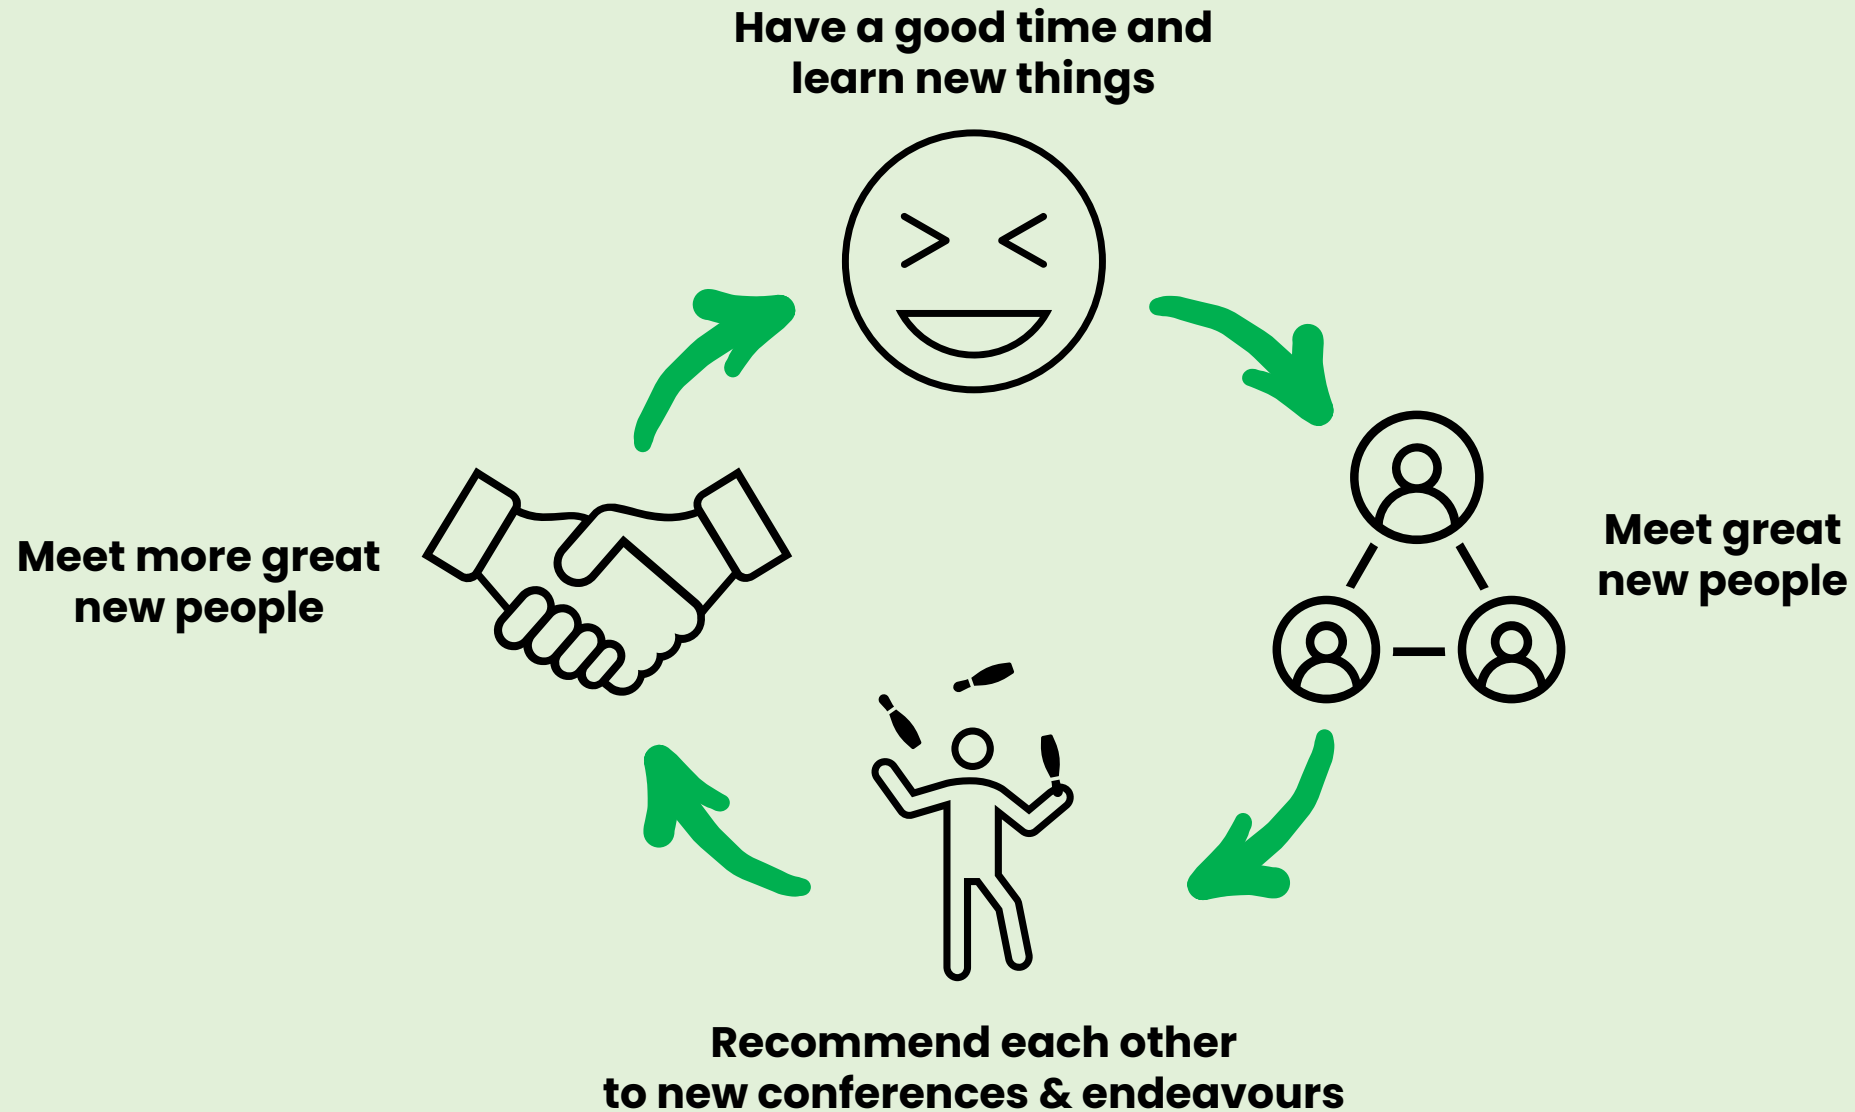

No time for improvement

Toxic behaviours

Fake Agile

Now, enjoy a positive self-reinforcing loop! :)
